

CXL 5700-1/...

Unity Gain Base Station and Marine 5700 MHz Antenna for Mounting on Threaded 1" Water pipe

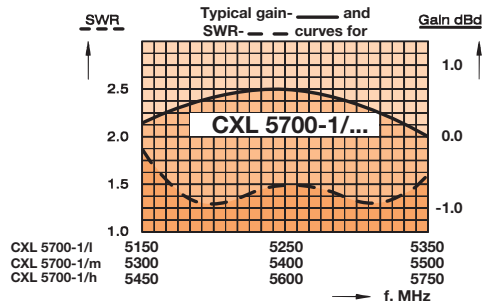

DESCRIPTION:

- ★ The CXL 5700-1/... is a 0 dBd, vertically polarised, omnidirectional rod-type base station and marine antenna for the 5700 MHz band.
- ★ The 1" revolving nut mounting system is standard throughout the marine sector, and several different mounting brackets are available, making it possible to install the antenna either on the masthead using FLG or SMR 2, side-mounted on the mast (SMR 1) or mounted on a cross-beam (FLG). Also, the antenna can be mounted on deck or rooftop by means of the FLG.
- ★ The higher the antenna is mounted, the better coverage. Avoid mounting the antenna parallel to or in the neighbourhood of other metal parts, such as masts, supporting wires etc., otherwise the SWR and the radiation pattern may be strongly influenced.
- ★ A conical glassfiber tube completely encloses the carefully designed radiating element to ensure long dependable service in all climates.
